

## Project launch - Thank you

Dear colleagues

We would like to extend our warmest thanks to everyone who took part in the PEPR Origins launch event. This event enabled us to start building this exciting collaborative project together. The presentations and our discussions have led to the perspective of many fruitful collaborations. It's clear that new ideas for collaboration have sprouted during these days of rich exchanges. Many thanks to those who were able to make the trip. We were delighted to meet you all. We would also like to thank those of you who were able to follow the event from a distance, and we apologize for any technical difficulties encountered. This launch marks the beginning of a wide-ranging collaboration and heralds further fruitful collaborative encounters.

## Website launch

The PEPR website is now online. All news will be published there.

You will find all the descriptions of the different axes and projects on the site.

Don't hesitate to send us any information you think might be useful to the community, and we will be happy to pass it on.

Here is the link : [here](#)

## Call for project

The Origins call for projects closed on October 15.

If you submitted a project to this call, we will get back to you to inform you of the outcome.
